

Marvellous Minibeasts

Make a mini bug hotel

We can help minibeasts in our garden or wild places by creating more homes for them.

Lots of minibeasts like to find sheltered places to hide in, from things that might eat them or the weather outside!

Try filling up this plant pot with bits of stick, leaves, stones and anything else you can find in the woods! Make sure to pack it tight so that all the items don't fall out.
